Work Experience

Software Developer

Terrene Inc.

Jan 2018 - April 2018

- Implemented artificial neural network algorithms which significantly reduced overfitting by 60%; used by businesses to reduce inventory overhead.
- Created machine learning pipelines on model metadata using Django, PostgreSQL, AWS,
 Pandas, and ML libraries which provides insights to improve models accuracy.
- Decreased runtime of data scraper by 80% by implementing C level algorithms in Python
- Utilized VueJS and graphing libraries to visualize inventory data through clientele portal

creased runtime of data scraper by **80%** by Dia

Projects

TheatreShare

Web-Application

- Created full stack application that allows users to watch videos and chat together in real time using Django, Redis and VueJS
- Developed server REST APIs to handle user authentication and store user data
- Implemented WebSockets using a Redis queue as a message broker for instant video streaming and chatting

Immersify

Web-Application

- Developed a web application that visually scans texts, assigns a sentimental score, and plays instrumental music pertaining to that emotion
- Utilized Google Firebase, IBM Watson, Google Vision API, and Angular2 to create a streamline web application.
- Hackathon winner. Best use of Google Platform's API.

Gangl

Design Project

- Collaborated with 5 other members to launch project from start to finish by utilizing the agile **design process**
- Conducted extensive needs assessment research and learnability user testing which improved overall usability of the final mobile application

Skills

Languages:

Python JavaScript

C++ HTML

Java CSS

Technologies:

Django Redis Jupyter

Vue PostgreSQL Git

Pandas Docker

Keras Bash

SciKit AWS

Education

Systems Design Engineering

University of Waterloo, BASc Candidate

Relevant Courses: Digital Computation, Human Factors in Design

Hobbies

Muay Thai, Weight Lifting, Photography, Basketball, Flute
